

# MIT ILLUMINATIONS SEMINAR

# Today

Anna & Policarpo from SOSO Limited

But first!

Illuminations Final Project

# Illuminations Final Project

Design & implement a lighting scene to go on either:

- a) the lighting installation at the MIT Welcome Center
- b) On your WS2812B LED Light strips

# Illuminations Final Project

- Either individual or in pairs
- Must be dynamic and incorporate some kind of **external data** (live data like weather, time of day, number of blue bikes at the nearest station, etc.), an uploaded photo, etc.

# Illuminations Final Project

- **Creative Exploration** - What's the story?
- **Technical Execution** - How did you implement and execute the vision? How is the attention to detail?
- **Overall Composition** - Do the aesthetics work? Is the right message conveyed?

# Illuminations Final Project

## Deliverables

- A 3-minute (ish) live presentation
- A portfolio-style writeup

Details to be posted on [learn.illuminations.mit.edu](https://learn.illuminations.mit.edu)
